| Immunogen :         | The antiserum was produced against synthesized peptide derived from human CATD. AA range:150-199                                                                      |
| Specificity :       | Cleaved-Cathepsin D HC (L169) Polyclonal Antibody detects endogenous levels of fragment of activated Cathepsin D HC protein resulting from cleavage adjacent to L169. |
| Formulation :       | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.                                                                                               |
| Source :            | Rabbit                                                                                                                                                                |
| Dilution :          | Western Blot: 1/500 - 1/2000. ELISA: 1/40000. Not yet tested in other applications.                                                                                   |
| Purification :      | The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.                                                 |
| Concentration :     | 1 mg/ml                                                                                                                                                               |
| Storage_stability : | -20°C/1 year                                                                                                                                                          |
